CE - PI (MEets) RDE wants results

RS wants to speed up Bolus part TBS

Bkgd - WHY

1. basic clin research concepts/ stages /success rates based on ~~pharma~~ model/ typical timelines for clin studies — don't use term

JH 01/02 – 02/02

2. data cleaning necessary before release results

3. typical human biovariability (intra/ inter subject)

4.

what is clin res – our studies overview (findings, design, cost to)

CE role start – pp it up, video to exp

very simple, basic approach

explain

typical / difference goes beside/along how exp. drug

Hewwm model / why variability much
